

## Multiplication KS2

<p><b>KS1</b></p>	<p>Pupils should memorise and reason with numbers in 2, 5 and 10 times tables. They should see ways to represent odd and even numbers and know how they are represented in tables. This will help them to understand the pattern in numbers.</p> <p>Pupils should begin to understand multiplication as scaling in terms of double and half (e.g. that tower of cubes is double the height of the other tower).</p> <p>Commutative law shown on array. Repeated addition can be shown mentally on a number line. Inverse relationship between multiplication and division. Use an array to explore how numbers can be organised into groups.</p>	
<p>Year</p>	<p>3</p>	<p>4</p>
<p>Layers of vocabulary</p>  <p><b>Appendix 1a</b> Beck's Tiers of Vocabulary <b>Appendix 1b:</b> Vocabulary book</p>	<p><b>Basic to subject specific (Beck's Tiers):</b> lots of, groups of <math>\times</math>, times, multiply, multiplication, multiplied by multiple of, product once, twice, three times... ten times... times as (big, long, wide... and so on) repeated addition array row, column double, halve share, share equally one each, two each, three each...</p> <p><b>Instructional vocabulary:</b> carry on, continue repeat what comes next? predict describe the pattern, describe the rule find, find all, find different, investigate choose, decide, collect</p>	<p><b>Basic to subject specific (Beck's Tiers):</b> lots of, groups of times, multiply, multiplication, multiplied by multiple of, product once, twice, three times... ten times... times as (big, long, wide... and so on) repeated addition array row, column double, halve, factor, multiple</p> <p><b>Instructional vocabulary:</b> carry on, continue, repeat what comes next? predict describe the pattern, describe the rule pattern, puzzle, calculate, calculation, mental calculation, method, jotting, answer right, correct, wrong what could we try next? how did you work it out? number sentence sign, operation, symbol, equation</p>
<p>NC 2014</p>	<p>Write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including 2 digit numbers times 1 digit numbers progressing to formal written methods.</p>	<p>Multiply 2 digit and 3 digit numbers by a 1 digit number using formal written layout. Solve problems involving multiplying and adding.</p>

<p>Developing Conceptual/ Procedural Understanding</p>	<p><b>Building tables</b></p>  <p>For example, build tables using counting stick-forwards and backwards and with missing jumps</p> <p><b>MULTIPLICATION BOARD ITP</b></p> <p><b>MULTIPLICATION TABLES ITP</b></p> <p><b>Using known facts</b> If <math>3 \times 2 = 6</math>, then <math>30 \times 2 = 60</math>, <math>60 \div 3 = 20</math> and <math>30 = 60 \div 2</math>.</p> <p><b>Associativity</b> <math>(2 \times 3) \times 4 = 2 \times (3 \times 4)</math> <math>6 \times 4 = 24</math>      <math>2 \times 12 = 24</math></p> 	<p><b>Partitioning strategy to double</b> Double 35</p>  <p><b>Place value materials to represent calculations</b> Diennes and then place value counters.</p> <p><b>Partitioning</b> Informal recording of partitioned numbers <math>15 \times 5 = 75</math></p> <p><math>10 \times 5 = 50</math> <math>5 \times 5 = 25</math></p> <p><math>27 \times 3 = 81</math></p> <p><math>20 \times 3 = 60</math> <math>7 \times 3 = 21</math></p> <p>“20 multiplied by 3 equals 60 and 7 multiplied by 3 equals 21. 60 add 21 equals 81.”</p>	<p><b>Grid method</b> <math>23 \times 8 =</math> <math>20 \times 8 = 160</math> <math>3 \times 8 = 24</math> <math>23 \times 8 = 184</math></p>  <p><b>Short multiplication</b> Expanded</p> $\begin{array}{r} 23 \\ \times 8 \\ \hline 184 \end{array}$ <p>leading to compact</p> $\begin{array}{r} 23 \\ \times 8 \\ \hline 184 \\ 2 \end{array}$ <p><b>Decision making</b> What pair of numbers could be written in the boxes? <math>\square \times \square = 24</math></p> <p><b>Representing problems</b> A group of aliens live on Planet Xert. Tinions have three legs, Quinions have four legs. The group has 22 legs altogether. How many Tinions and Quinions might there be? Is there more than one solution?</p>	<p><b>Building tables</b></p>  <p>For example, build tables using counting stick-forwards and backwards and with missing jumps</p> <p><b>Using known facts</b> If <math>2 \times 3 = 6</math> then <math>200 \times 3 = 600</math> and <math>600 \div 3 = 200</math></p> <p><b>Distributivity</b> <math>3 \times (2 + 4) = 3 \times 2 + 3 \times 4</math> So the '3' can be 'distributed' across the '2 + 4' into 3 times 2 and 3 times 4</p>  <p>leading to</p> $13 \times 4 = 10 \times 4 + 3 \times 4 = 52$ 	<p><b>Place value materials to represent calculations</b></p> <p><b>Grid method</b> (if needed for conceptual understanding)</p> $346 \times 9$  <p><b>Short multiplication</b> Expanded</p> $\begin{array}{r} 346 \\ \times 9 \\ \hline 3114 \end{array}$ <p>leading to compact</p> $\begin{array}{r} 346 \\ \times 9 \\ \hline 3114 \\ 45 \end{array}$	<p><b>Representing problems</b> In one month, Charlie read 814 pages in his books. His mum read 4 times as much as Charlie which was 184 pages more than Charlie's dad. How many pages did they read altogether?</p>  <p>Multiply a number by itself and then make one factor one more and the other one less. What do you notice? Does this always happen?</p> <p><math>Eq 4 \times 4 = 16</math>      <math>6 \times 6 = 36</math> <math>5 \times 3 = 15</math>      <math>7 \times 5 = 35</math></p> <p>Try out more examples to prove your thinking.</p>   <p>Place <math>&lt;</math>, <math>&gt;</math>, or <math>=</math> in these number sentences to make them correct: <math>50 \times 4</math>   <math>4 \times 50</math> <math>4 \times 50</math>   <math>40 \times 5</math> <math>200 \times 5</math>   <math>3 \times 300</math></p>
<p>With jottings... or in your head</p>	<p>Write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for 2 digit numbers times 1 digit numbers using mental methods. Solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems (four times as high, eight times as long etc.) and correspondence problems in which n objects are connected to m objects (3 hats and 4 coats, how many different outfits?).</p>		<p>Use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers. Recognise and use factor pairs and commutativity in mental calculations. Solve problems involving multiplying and adding, including using the distributive law to multiply 2 digit numbers by 1 digit (<math>39 \times 7 = 30 \times 7 + 9 \times 7</math>), integer scaling problems and harder correspondence problems such as n objects are connected to m objects.</p>			
<p>Known facts</p>	<p>Recall and use <math>\times</math> and <math>\div</math> facts for the 3, 4 and 8 <math>\times</math> tables</p>		<p>Recall <math>\times</math> and <math>\div</math> facts for <math>\times</math> tables up to <math>12 \times 12</math>.</p>			
<p>Checking strategies</p>	<p>Through doubling, connect the 2x, 4x and 8x multiplication tables. Estimate the answer to a calculation and use inverse operations to check answers. Develop efficient mental methods, for example, using commutativity and associativity (<math>4 \times 12 \times 5 = 4 \times 5 \times 12 = 20 \times 12 = 240</math> or <math>4 \times 5 \times 12</math>)</p>		<p>Estimate and use inverse operations to check answers to a calculation. Approximate using the most significant digit, rounding skills.</p>			

# Multiplication KS2

	= 4 x 60 = 240) and multiplication and division facts to derive related facts.			
Essential knowledge	Review 2x, 5x and 10x	Double 2 digit numbers	4x and 8x tables	10x bigger
	4x table	3x table	3x, 6x and 12x tables	Double larger numbers and decimals
	8 x table	6x table	3x and 9x tables	11x and 7x tables

	<p><b>Using known facts</b> If <math>2 \times 3 = 6</math> then <math>2000 \times 3 = 6000</math> and <math>200 \times 30 = 6000</math></p> <p><b>Place value materials to represent calculations</b></p> <p>Place value counters</p> <p><b>Short multiplication</b> Use expanded method first if needed to build conceptual understanding</p> $\begin{array}{r} 4346 \\ \times 8 \\ \hline 34768 \\ 234 \end{array}$	<p>followed by column addition</p> <p><b>Long multiplication</b> Expanded</p> $\begin{array}{r} 28 \\ \times 27 \\ \hline 56 \text{ (7x8)} \\ 140 \text{ (7 x20)} \\ 160 \text{ (20x8)} \\ \hline 400 \text{ (20x20)} \\ 756 \end{array}$	<p>Extend to HTU x TU or ThHTU x TU as appropriate</p> <p><b>Decision making</b> Children investigate alternative methods such as compensation strategies and doubling and halving and discuss when these might be most appropriate and efficient. Examples:</p> <p><math>24 \times 99</math> could be calculated by <math>\times 100</math> and subtracting <math>24 \times 1</math>.</p> <p><math>24 \times 25</math> could be calculated by <math>24 \times 100</math>, halving to find <math>\times 50</math> and halving again to find <math>\times 25</math>. or using doubling and halving, <math>24 \times 25 = 12 \times 50 = 6 \times 100</math></p> <p><b>Representing problems</b> 40 cupcakes cost £3.60, how much do 20 cupcakes cost? How much do 80 cupcakes cost? How much do 10 cupcakes cost?</p>	<p><b>Long multiplication</b> Use expanded method first if needed to build conceptual understanding</p> $\begin{array}{r} 5172 \\ \times 27 \\ \hline 36204 \\ 15114 \\ \hline 139644 \end{array}$	<p><b>and money</b></p> <table border="1" data-bbox="1606 224 1831 293"> <tr> <td>x</td> <td>0.7</td> <td>0.05</td> </tr> <tr> <td>6</td> <td></td> <td></td> </tr> </table> <p><b>Decision making</b> Kim knows that <math>137 \times 28 = 3836</math>. Explain how she can use this information to work out this multiplication: <math>138 \times 28</math></p> <p>Mike works out that <math>14 \times 12 = 168</math>. What is <math>14 \times 1.2</math>? How do you know?</p> <p>'When you multiply two numbers together, the answer is always greater than either of the numbers you started with.' Is Alfie correct? Explain how you know.</p> <p><b>Representing problems</b> Amy is given the calculation <math>5413 \times 600</math>. She says "I can do this without a written method." Write down the mental steps you think Amy could do.</p> <div data-bbox="1591 854 1919 1203">  </div>	x	0.7	0.05	6		
x	0.7	0.05									
6											
<p>With jottings... or in your head</p>	<p>Multiply and divide numbers mentally drawing upon known facts Partition to multiply mentally Multiply and divide whole numbers and those involving decimals by 10, 100 and 1000 Identify multiples and factors, including finding all factor pairs of a number and common factors of two numbers Establish whether a number up to 100 is prime</p>			<p>Perform mental calculations, including with mixed operations and large numbers Use knowledge of the order of operations to carry out calculations involving the four operations (<math>2 + 1 \times 3 = 5</math> and <math>(2+1) \times 3 = 9</math>)</p>							
<p>Known facts</p>	<p>Know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers</p> <p>Identify common factors, common multiples and prime numbers</p>										

## Multiplication KS2

	Recall prime numbers up to 19 Recognise and use square and cube numbers and the notation for squared ( <sup>2</sup> ) and cubed ( <sup>3</sup> )		
Checking strategies	Use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy. Promote decision making so that pupils choose an appropriate method/strategy.		Use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy.
Essential knowledge	4x and 8x tables	100, 1000 times bigger	Multiplication facts up to 12 x 12
	3x, 6x and 12x tables; 3x and 9x tables	10, 100, 1000 times smaller	Apply place value to derive multiplication facts, e.g. 3 x 4 = 12 so 3 x 0.4 = 1.2
	11x and 7x tables	Double larger numbers and decimals	
			Partition to multiply mentally Double larger numbers and decimals
